Recovery from anorexia
Symposium in the presence of HRH Princess Sofia

Monday June 3, 2019
08.55 am – 12.00 pm

Sophiahemmet Högskola, Erforssalen, Vallhallavägen 91, house R, level 2

Searching for food and eating have dominated human evolution and shaped our behaviour and anatomy and the function of our brain. This knowledge can be translated into clinical practice.

Johanna Adami, professor, Vice Chancellor, Sophiahemmet Högskola
Introduction
09.00-09.05

Cecilia Bergh, PhD, CEO Mando
Interview with a patient and treatment
09.05-09.25

Julian Shield, professor of diabetes and metabolic endocrinology
University of Bristol and Bristol Royal Hospital for Children
Modifying eating behaviour to improve weight loss in adolescent and child obesity — lessons from my Swedish collaboration
09.30-09.45
